

Mission Statement

To provide the best medical services, our first responsibility is to our patients and their families – to provide the highest quality, most sensitive care. All our efforts must be compassionate, prompt and focused on the individual's needs and desires. Patients and families judge the value of all we do.

We are only as good as our people – each individual and each contribution is important, and we must all collaborate to serve our patients.

We and our Medical Staff must work together with mutual respect to serve our patients.

We are responsible to our larger community – it judges how well we serve. We must listen and respond. We offer service to all.

REVISED SEPTEMBER, 2006
