We offer comp

Urology is a surgical specialty whose providers care for the male reproductive system and the female reproductive system.

Kidney and Bladder Concerns

From control issues, to infections, to stones to diagnosis and treatment of cancer, we offer state-of-the-art therapies, procedures and surgical expertise. We offer a wealth of experience in minimally invasive (laparoscopic) surgery, partial nephrectomy (partial removal of the kidney), laparoscopic cryoablation (to treat renal masses) and treatment for kidney/bladder/ureteral stones including shockwave (ESWL), laser fragmentation, stenting, urine studies, and stone analysis. We also offer cystoscopy (look inside bladder/urethra with a camera), tumor resection, biopsies and anti-tumor bladder treatments.

Incontinence

Our team also offers extensive experience in treating and managing incontinence, urinary tract infections, overactive bladder and Interstitial Cystitis. We offer comprehensive urodynamic evaluation and the latest treatments and therapies for urinary urge incontinence, including Interstim therapy - newly approved by the FDA. For stress incontinence, we perform state of the art procedures including slings and injectable urethral bulking agents.

Comprehensive expertise and unparalleled service.

Physicians are trained to treat disorders of the male and female urinary tract (i.e., the bladder, ureter, kidney and urethra) and the reproductive system. Urology Associates of York Hospital offers specialized treatment for...

Prostate Health

Urology Associates of York Hospital provides a full spectrum of diagnosis and treatment for prostate health, enlarged prostate (BPH), prostatitis and prostate cancer. We offer routine PSA checks; prostate ultrasound and biopsy; treatments such as the innovative “GreenLight” laser therapy to treat BPH, and complex surgical procedures including cryosurgery and radical prostatectomy.

Men’s Reproductive Health

We provide diagnostic work-ups and comprehensive treatment for erectile dysfunction (ED) and testicular concerns. Our treatment options include medical management as well as injection therapy, vacuum erection devices, and prosthetic implants for ED. Testicular concerns such as hydroceles (swelling) and spermatoceles (cysts) are readily available; and diagnosis and prompt treatment of testicular cancer is offered as well.

Male Infertility/Fertility

We also offer diagnosis, evaluation and treatment for male infertility including semen analysis, hormonal evaluation and micro-varicocele repair. We also provide vasectomies and vasectomy reversals.

Pediatric Urology

Our skilled staff also offer expertise with pediatric needs such as treatment for urinary tract infections and reflux, surgery to move undescended testes; pediatric hydroceles (swelling), and circumcisions.

When you need urologic care

trust the experts at Urology Associates of York Hospital. We offer expertise, state-of-the-art technology, advanced treatment options, and unsurpassed service.

What our patients have to say...

- *"I felt like I was being treated with kindness and compassion. The doctors and staff were excellent."*
